

Facade & Window — Technical Spec

GLASS · STONE · STUCCO · BRICK · METAL PANEL — MULTI-STORY, HANDS-OFF

METHOD

APPLICATION	Aerial soft-wash — calibrated nozzle, elevation-by-elevation passes
REACH	15+ stories — no swing stage, scaffold or boom lift
STAGING	Ground rig footprint ≈ two parking spaces, inside property line
PERMITS	Typically none — no ROW closure, no MOT plan

CHEMISTRY

STUCCO / EIFS / PAINTED	CitraShield + SH soft-wash blend, surface-matched dilution
GLASS & CURTAIN WALL	Deionized water final rinse — spot-free, zero residue
DWELL	Timed to neutralize organic staining at the root
RUNOFF	EPA-compliant; landscaping protected

COMPLIANCE & DOCUMENTATION

PILOT	FAA Part 107 certified — verifiable in the FAA airman registry
AIRSPACE	LAANC authorization handled by operator
WORKERS AT HEIGHT	Zero — no OSHA fall-protection surface on your vendor file
DELIVERABLE	Dated before/after imagery of every elevation, with invoice
